E-Catrax Portable Stadium Automated

Projected with rounded corners and with plenty of internal space inside of the column, it allows easy electronic components assembly. The access to the column is through locking key-secret, without exposed screws.

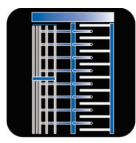

Comfort pass through, with 90 degree open arm angle, to provide a soft twist and smooth the person arm impact during the passage.

Reliability and safety with optical sensors and electromagnets to drive the locks, avoiding mechanical wear, increasing the equipment life time.

Allows top panel customization in three different colors (injected plastic – Black, wine and green) and the stainless steel panel plate with the customer's mark.

Optional slot for barcode or magnetic card readers.

Made with "U" (drawer type) bracket, which can easily be removed or replaced by the top of column, with key-secret, which makes much easier the electronic assembly and maintenance actions.

Disarms the arm automatically in emergency situations, leaving the passage free. The resource can be triggered in a control room or in case of an electric breakdown. It includes pictograms indicating access direction permissions. Also, it comes with a portable base with rail and a wheel for portability.

E-ticket registration for control and security for the access solution. Ideal for:

Stadiums, Academies, Airports, Hospitals, Public Transportation, Parks, Teaching Institutions, Condos.

Developed for use in sporting events, it is the best solution for arenas and stadiums. Accepts several types of tickets.

It includes a KT-1 Controller:

- Operational One Button Enrollment
- Capacitive touch-sensitive button
- Reader Types:
Wiegand, Proximity, ABA Clock and Data, Bar Code, Magnetic, Integrated Keypad, Smart Card, RS-485 and Customized with Protocol Conversion (optional)
- Number of Cards in Stand-Alone Mode: 100,000
- Monitored Points (Inputs): 4 monitored points, single EOL, double EOL (Independently programmable)
- Reader Outputs: LED and buzzer (25 mA maximum each, open collector outputs)
- Auxiliary Outputs: OUT3 and OUT4 (25 mA each, open collector outputs).
